

WWTFB Activity 5.1

Solutions to reduce polluted air in cities

Blue Team

If we use the renewable energy instead of fossil energy we can reduce about **27 %** of the CO2 emissions

Benefits of the led

Energy-saving

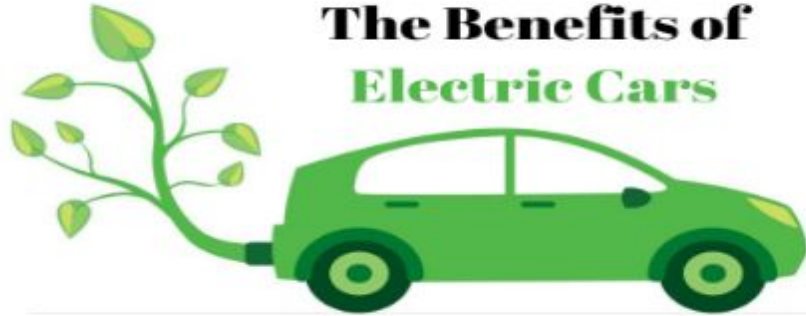

Long life, Flexible, colorful and efficient

Environmentally friendly

They have 50%-90% less consumption compared to traditional lamps, and they pay off their costs in a short time.

The benefits of using electric cars

The Benefits of Electric Cars

The drive system is the centerpiece of a battery-electric vehicle. Comprising the power electronics, electric motor, transmission, and battery, the drive system generates zero local CO₂ emissions and delivers full torque right from the start. In 2030, one in three new vehicles will be a purely electric vehicle thanks to the electric drive's steadily improving efficiency and the sinking total cost of ownership for such models.

The Benefits of Using Bikes instead of Cars

Eliminating common air pollutants like CO, CO2, NOx and other dust particles

Encouraging the use of renewable energy sources instead of fossil fuels
