

Use the lamps, Light up your future !

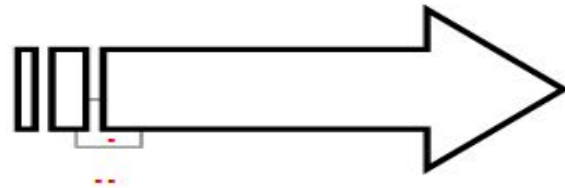

- We can protect our environment by recycling lamps
- DONT SEE EVERYTING AS GARBAGE !
- Recycle today for a better tomorrow
- Dont use light bulls, use leds
- We can get beautiful items by using lamps

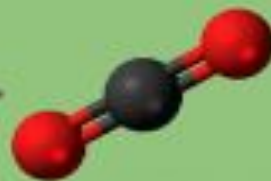

**For a cleaner world use glass
bottles instead of plastic
ones!**

Industry is responsible for the emission of 11% of CO₂

We could buy less in order that the factories no longer produce in such large quantities

or wear second hand

Importance of avoiding deforestation

Deforestation can be defined as the large-scale removal of trees from forests (or other lands) for the facilitation of human activities.

You can contribute to the efforts against deforestation by doing these easy steps:

- 1) Plant More Trees**
- 2) Reduce paper consumption**
- 3) Raise awareness about deforestation in your social circle and community.**
- 4) Support the recycling economy by buying recycled products and recycling them again after use.**
