1 Metal work

we have four training
at gabriel peri high
school

and we study electricity

2 Help for the elderly

3 Animation for children

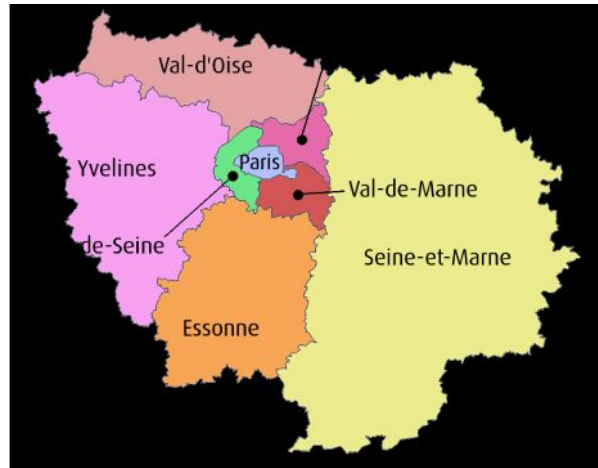

High school location in FRANCE

location: 10 kilometers of Paris

My school is located in île de France

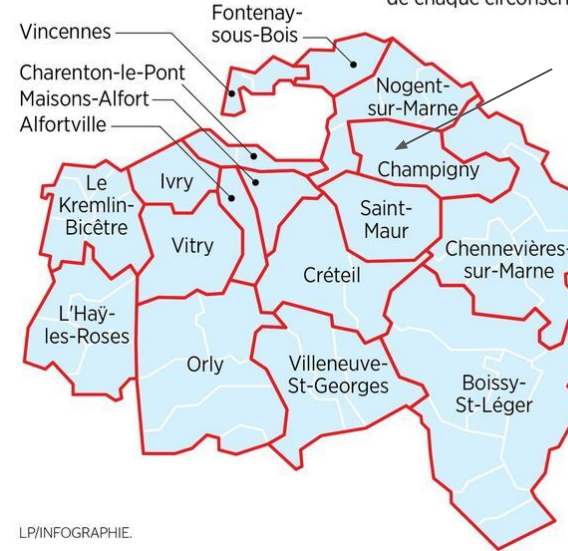

my school is located in the Val de Marne

My school is located in Champigny

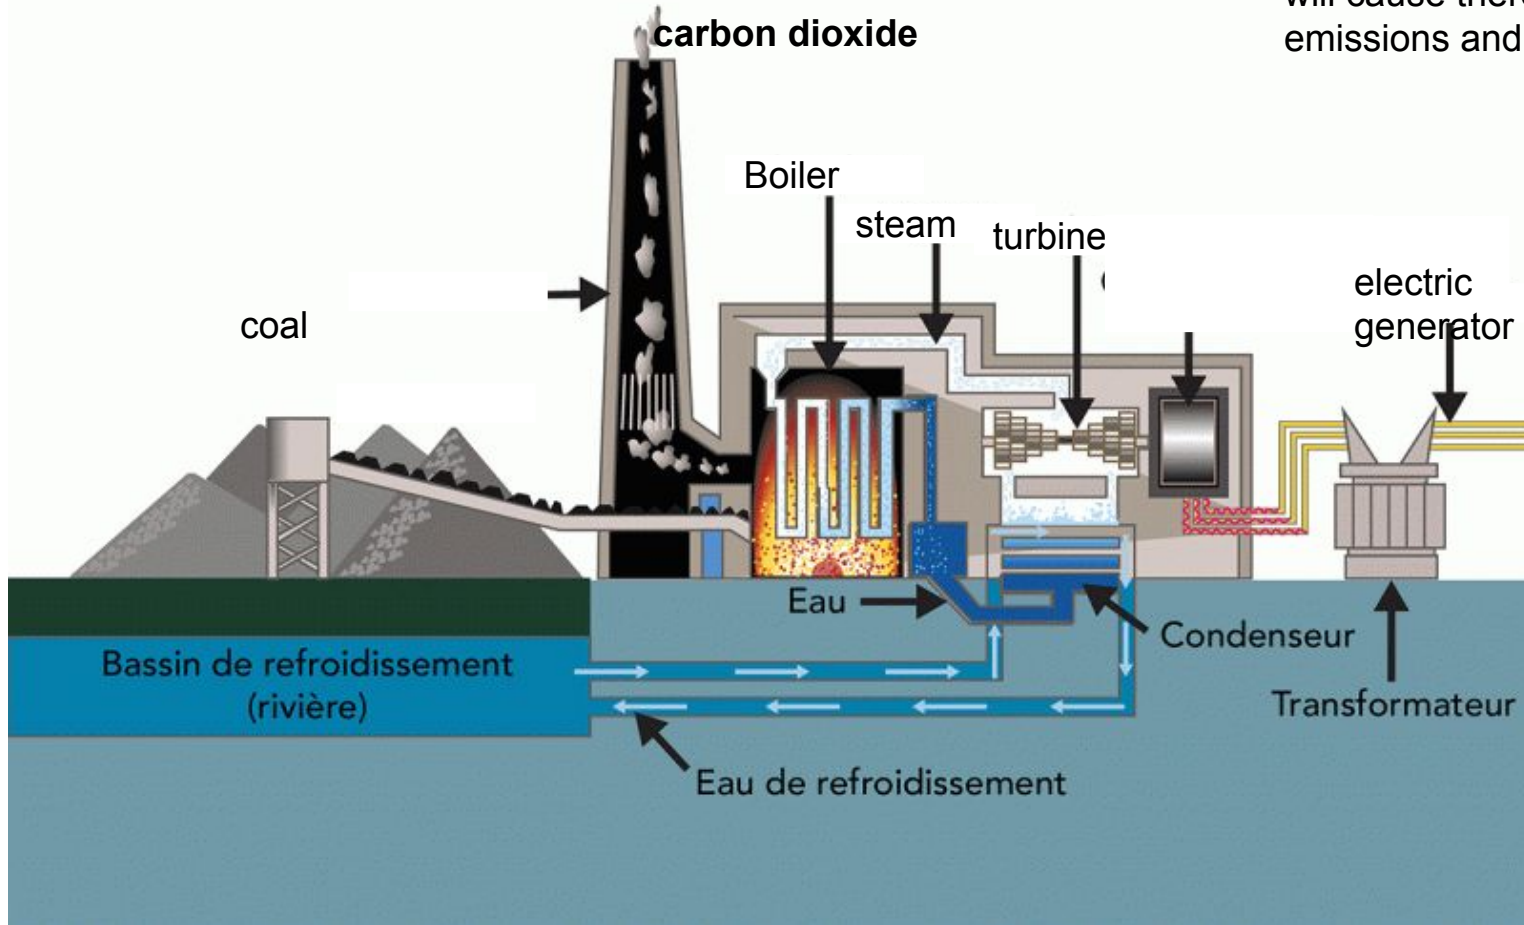

le point

NOIR DU COMMISS
de chaque circonscri

Electricity produce air pollution

you can see coal going into the factory and which will burn which will cause there to be gas emissions and will therefore pollute

Transport produce air pollution

Traveling by vehicle increases air pollution in cities

Solution for Transport reduce air pollution in my school

We have set up a garage for bikes and scooters, the students will come on bikes to break air pollution

-One solution put in place use of bicycles and scooters to come to school

In my school

Solution for Transport and Electricity reduce air pollution in my school

Solar energy

solar energy is used to
reduce pollution air

Device to load electric
bike with solar energy

Solution for Transport and Electricity reduce air pollution in my school

*sorting waste reduces air pollution
because we use fossil fuels to destroy
waste*

We are happy to work with you in Romania
