

ROMANIA

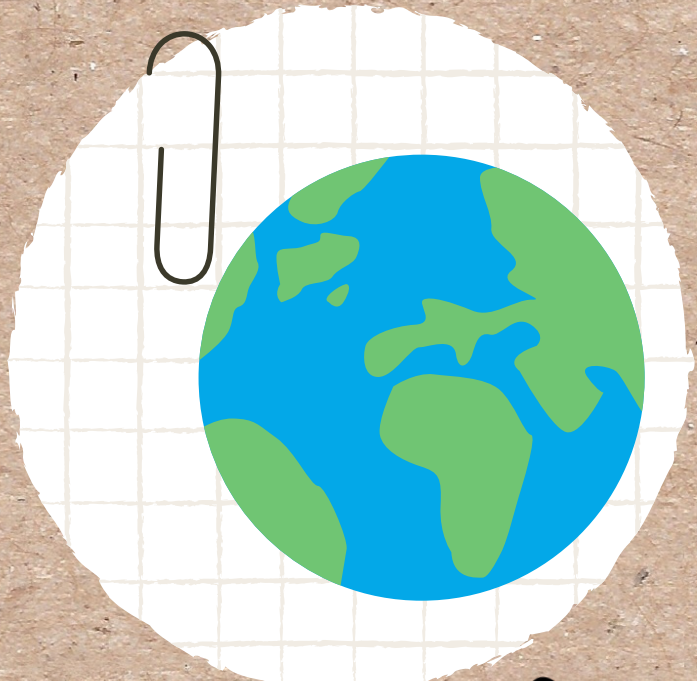

solutions for air pollution

What is going on with Romania?

Following the web Datosmacro.com Romania was the number 138 in the ranking of countries with CO2 emissions in 2021 with a total of 78,747 megatons, and in 2022 the medium concentration of PM2,5 was 3.4 times the medium annual value of air quality of the OMS.

You want a better world to live in? You also want a better future for you and the rest of the planet?

“ YOU SHOULD START DOING THINGS LIKE THESE ”

HOW DO WE GET ALL OF THAT?

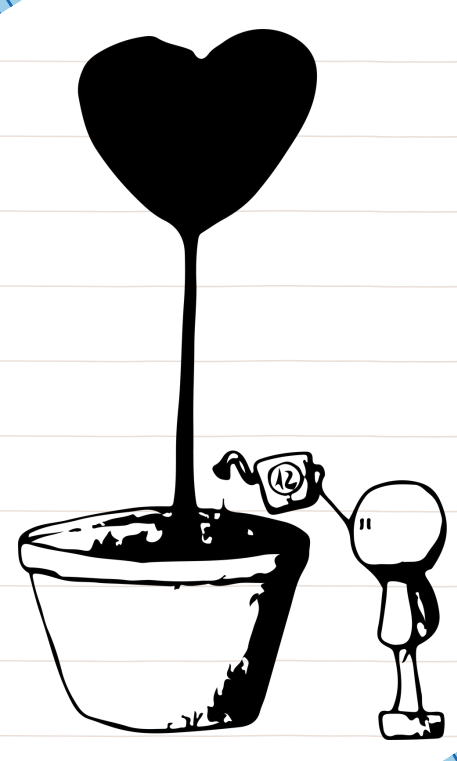

We have to think in our planet and in our lives there, and what we want to do to change the bad situation of it.

Improve the ambiental politics

Take care of the forests and plants

Reduce the coal footprint

Recycle for avoiding bad gases reaches the atmosphere

TAKE CARE OF THE PLANET IS TAKING CARE OF OUR LIVES AND THE LIVES OF OTHER FUTURE GENERATIONS

SOLUTIONS

IMPROVE THE AMBIENTAL POLTICS

Because are the actions that are made based on the science, deals and politics. They are looking for the stability in the society, the economy and the environment.

PROTECT THE FORESTS

It is so necessary for fighting against the climate change, because 2 billions of tons of carbon-dyoxide are absorbed by them each year.

REDUCE THE CARBON FOOTPRINT

Reduce the use of the clothes-dryer

Disconnect the phone charger.

Clean up your fridge.

Reduce eating meat.

Remember the three R

REUSE

RECYCLE

REDUCE

**RECYCLE THE MORE YOU CAN FOR A BETTER
WORLD**
